iProjection

Display content from your iOS or Android device with the EPSON iProjection app. This application allows road warriors to travel light and present from their mobile devices. For teachers, walking around the class and sharing content larger than life is a snap. The Epson iProjection app will enable you to have the wireless freedom you've come to expect from your mobile device. The app is easy to use and navigate with intuitive menu options that help bring your mobile content to the big screen.

1 Connect your device to the network your projector is on

2 Launch the EPSON iProjection App and select the connected projector you wish to use

3 Select the file you wish to project (document, photo, etc.) and you're ready to go

MID RANGE

Epson EB-1965

Powerful and easy to use, this range of projectors offers low cost of ownership, and ease of maintenance. Beautiful crisp, clear images make Epson's Mid Range projectors the ideal choice for use in a wide variety of Corporate and Education environments.

Education Models

The Epson range of Ultra Short Throw projectors are available in an Education specific configuration; denoted by an "e" on the end of the name. Visit www.epson.com.au or www.epson.co.nz for more information.

Start Lessons Instantly with Instant Annotation

Why wait for a PC to start up before you start your lesson? The EB-475Wi and EB-485Wi both share a unique feature whereby you simply turn on the projector, grab your interactive pen, and start writing!

Twice the Engagement

With not one, but two interactive pens included your journey to class engagement is only as far away as your imagination. Both interactive pens function independently of each other, and simultaneously!

BUSINESS INTERACTIVE

Meeting**Mate**
collaborate. create. share.

Epson EB-1410Wi

MeetingMate interactive projectors provide the complete solution for any meeting room. A perfect alternative to copyboards and other presentation equipment, it combines multiple devices into one simple device that enhances collaboration through interactive functionality, idea creation and content sharing - all without a PC!

PC Free Whiteboard

With the new Whiteboard function, now you can start a meeting "instantly" without the need for a PC! Simply walk into the meeting room and switch to Whiteboard mode and start writing notes or annotating images. The new control pad facilitates these functions with simple and intuitive command buttons. What's more, the function buttons on the control pad are replicated on the remote control, so it's never been easier to get going.

Save, Print, Email

At the end of your meeting, you can **SAVE**, **PRINT** or **EMAIL** your meeting notes instantly. It's that easy!
SAVE your meeting notes on a USB drive or the network drive. Never lose any of your meeting notes again!
PRINT your meeting notes wirelessly or to the network printer, so all team members can walk away with the action points.
EMAIL the meeting notes from the Whiteboard to your email address.

Dual User Interactivity

With dual user interactivity, two users can annotate on the presentation content simultaneously. Presentations will never be the same, now you can engage your audience, collaborate with your colleagues and interact with your presentation content for more engaging presentations.

INSTALLATION

Epson EB-G6750WU

Powerful performers that are easy to install, manage and maintain. Epson's range of installation projectors offers up to 10,000 lumens of colour/white light output for captivating presentations in virtually any venue. Featuring WUXGA resolution and innovative 3LCD technology, these projectors deliver brilliant images in lecture halls, conference centres and entertainment venues.

HOME THEATRE

Epson EH-TW9100W

Experience rich cinematic adventures at home with Epson home cinema projectors. Whether you enjoy movies, games, or sporting events, every image is sure to pop off the screen with state-of-the-art, innovative projector features.

WirelessHD

Eliminate cable clutter and simplify installations! WirelessHD enables the transfer of HDMI digital signals without compression or deterioration. You can now wirelessly stream Full HD and 3D content directly to your Epson Projector, giving you high quality images every time.

Epson 3D

Enjoy thrilling 3D adventures right in the comfort of your living room. Featuring Epson's Bright 3D Drive technology, these home theatre projectors put you right in the middle of the action. Epson's drive system minimises the blackout time of 3D glasses and provides greater brightness when viewing 3D content.

PERIPHERALS

Visualisers

Visualisers are digital teaching tools that allow teachers and students to display and share a much wider range of information, including books, 3D objects, and detailed demonstrations or experiments, releasing them from the constraints of paper.

ELP-DC06

The Epson DC-06 is a flexible, compact and portable visualiser with USB connectivity to an Epson projector, PC or Mac. Powered via USB for ease and simplicity.

ELP-DC11

The Epson DC-11 is a high performance visualiser featuring amazing image quality with a 5MP sensor and SXGA resolution and advanced connectivity. A versatile teaching tool, that is a must have for every modern classroom.

ELP-DC20

The Epson DC-20 enables users to turn their existing projector into a fully interactive Education or Business creativity tool. The large optical sensor provides sharp, clear images to store on the internal memory.

SCREENS

Epson has a range of table top and tripod screens.

MOUNTS

Epson has Wall mounts, ceiling mounts and table mounts to suit all Epson projectors.

ACCESSORIES

High-speed, wireless network adapters plug directly into select Epson projectors allowing quick and easy access to the LAN or peer-to-peer networks without wires or cables.

Screens and Mounts

Epson screens offer the perfect solutions for both business presentations and home theatre use. Unique mechanisms make our screens more compact and highly portable. Designed by a specialist team of Epson engineers, our range of projector mounts and accessories provide strength, reliability & good looks for installations in a multitude of environments.

Education Solutions

Make the most of your projector with quality accessories from Epson. Epson has a solution for every teaching scenario. You can easily control Epson projectors and devices, by consolidating projector and source controls in a handy control and connection box. You can also add sound that reaches all students whether in the front or the back. Enhance your classroom with an Epson Education Solution.

ELP-CB01

The simple solution to cable management and projector control. With the ELP-CB01, users can access a broad range of connectivity options including HDMI, extend USB cable length and control audio and projector functionality.

ELP-SP02

Enhance the learning experience in your classroom with the crystal clear audio delivered by the 15W Active speaker set from Epson. A perfect match to your Epson projector.

Epson Lamps

Epson produces the core components of all its projectors, many of which are exclusively used in Epson products. Epson's Lamp technology allows our projectors to consume less power and be more eco friendly than others. Our lamps are smaller, so they are a lower cost. Lamp prices start from \$79/\$129 AU/NZ and can often last up to 5000-6000 hours. Epson lamps all have considerable recyclable content, in 100% recyclable and clearly labelled packaging. Non Epson, non-genuine lamps can be very expensive and have adverse effects on your projector. This includes melting, bad odour, uneven colours, failure to light, and internal overheating. Stick to genuine Epson lamps to get the most out of your Epson projector!

COLOUR LIGHT OUTPUT

What is Colour Brightness?

Colour Light Output (Colour Brightness) is a new standard that gives buyers the data they need to compare projectors. Brightness has long been the specification used for projector comparisons. However, the old specification measured only white light output, rather than measuring both white light output and colour light output. The vast majority of presentations today are in colour so measuring white brightness alone is insufficient. The Colour Light Output standard, for the first time, gives end users scientific data with which to compare colour across models and brands.

Why is Colour Brightness Important?

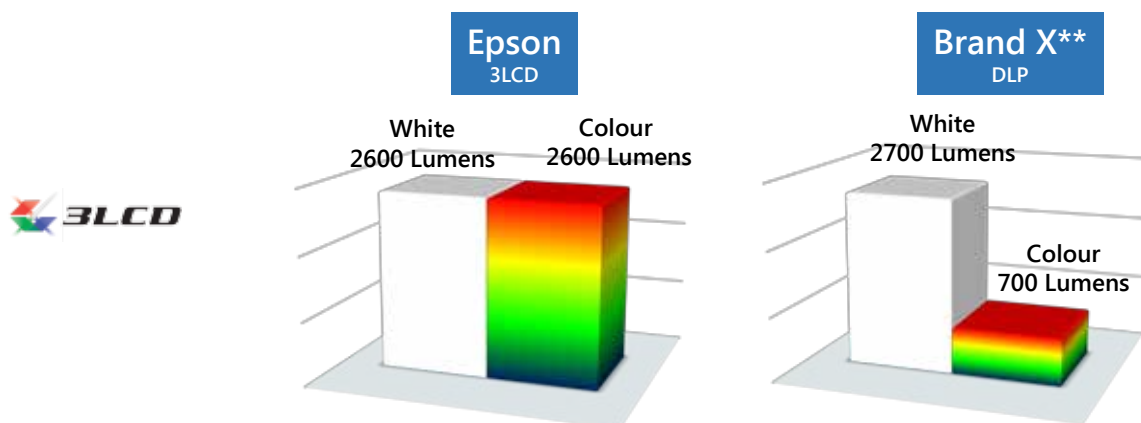

Colour is a critical component of image quality and users want great picture quality, when purchasing projectors. With the Colour Light Output standard, buyers can now compare colour between different models, brands and technology.

Leading manufacturers such as Epson, have adopted the standard in their product specification to help projector buyers. They now include two measurements — White Brightness (White Light Output) and Colour Brightness (Colour Light Output).

3x Brighter Colours with Epson*

Brilliant image quality requires high colour brightness. Epson projectors have 3x Brighter Colours than leading competitive projectors*. Delivering equivalent White Light Output and Colour Light Output, Epson projectors use 3LCD, 3-chip technology for brilliant images with true-to-life colour. The comparison below highlights the vast difference in colour brightness between Epson and a competing brand/technology.

Up to
3X Brighter
Colours
with Epson* Projectors*

* Compared to leading 1-chip DLP business and education projectors based on NPD data, July 2011 through June 2012. Colour brightness (colour light output) measured in accordance with IDMS 15.4. Colour brightness will vary depending on usage conditions.

** Data obtained from Projector Central as specified by the manufacturers. Competitor manufacturer does not provide Colour Brightness (Colour Light Output) data. Colour Brightness was determined in compliance with IDMS 15.4 by 3rd party laboratory testing of a single unit. All trademarks and logos are property of their respective owners.
