COPPER SPEAKER CABLES

152m REEL With Reelex Pulling Box Technology

Some people say that clothes hangers are a perfect substitute for speaker cable. Some say that we should use highly conductive, precious materials like silver (5% more conductive than copper). Most the industry would say that the truth is somewhere in between.

FEATURES

- **Oxygen free copper** - Ensures premium sound quality in your systems. Higher purity copper means better low level signal transmission and great sound
- **Rip cord** - Makes the cable as easy to strip as possible
- **Reverse metre marking** - Less scrap! See how much cable has been used and how much is left before you pull the cable
- **Reelex pulling box technology** - tangle-free twist-free
