

Tile Roof Ridged Stay Mounting Instructions

For 4ft, 6ft and 8ft masts

Step 1

Photo 1

Kick up three tiles revealing separate rafters.

(Please Note: It makes no difference whether the mast is at the top or bottom, or even if the mast or stay bars are on the same side of the roof or even on different faces of the roof)

Photo 2

Screw down "Z" brackets, leaving about 1 finger gap to the tile as shown. You

Can bend the "Z" bracket to suit the type of tile (as can be seen in photo) Use 12g x 50mm roofing screws

Photo 3

Poles laid out ready for step 2

Step 2

Photo 4

Bolt the mast and stay bars to the "Z" brackets

Photo 5

Tighten the bolts

Photo 6

After you plumb the mast

Photo 7

In both directions

Photo 8

Secure the adjustable stay bars with bolts supplied (10g x 16mm) (if you find the Mast clamp needs further securing use a 10g x 16mm screw as shown in photo 5)

Photo 9

Slide tile over "Z" brackets.

Photo 10

Carefully tuck cable under tile and tape to mast.
