DOSS®

NVR8IQ4K / NVR16IQ4K
DOSS IQ 4K NVR
8 OR 16 CHANNEL WITH POE

NOW SUPPORTING
4K IP CAMERAS
4K ULTRAHD

The new and improved DOSS intelligent NVRs have gone one step further, utilising 4K resolution compatibility for higher resolution PoE IP cameras.

NETWORK VIDEO RECORDER

FEATURES

- Full real time network video access to all channels
- H.264 dual-stream decoding, embedded Linux OS
- Supports simultaneous video playback & remote monitor
- Supports up to 2 hard drives
- VGA/HDMI synchronised output
- Up to 8MP output resolution

- 12x digital zoom in preview and playback modes
- Supports ONVIF, RTSP, GB28181 industry standard protocol
- Supports DDNS, EMAIL, UPNP, NTP, P2P
- Remote viewing via web-browser, smartphone app (iOS + Android) and PC Client

UP TO 8MP RESOLUTION

SMARTPHONE APP

Connect to your security network globally 24/7 online, whether by web-browser or via smartphone app.

iQ Features

These smart features give you a more targeted security system, utilising a sophisticated range of rules and algorithms. This allows the Video Recorders to send automated alerts or record specific trigger events, saving both time and effort when reviewing footage. So whether you need to protect restricted areas, important objects or count how many people enter a designated space, these NVRs are the perfect solution.

DETECTION MODE | **TARGET COUNT** | **OBJECT LOST** | **AREA DETECTION** | **LINE CROSSING**

4K Resolution

With the new ability to support 4K POE IP cameras, these NVRs can now capture and record not only the standard 2MP (1080p) footage, but playback up to 8MP (4K) resolution. This allows you to zoom in and view more than twice the detail within a larger image.

DOSS®

NEW DOSS IP CAMERAS

2MP, 4MP & 8MP RESOLUTION WITH POE

The new Doss cameras are better than even, now capturing footage at a higher resolution, allowing you to see more detail than with previous cameras. All models, (except the PTZ), boast built-in IQ features, utilising extra functions on your NVR such as monitoring a targeted object incase it is removed, or receiving an alert if a fire is detected.
