

ROUGH-N-KITS

RK-EC6

RK-EC8

RK-SS8

The Earthquake rough-in kits are designed to expedite installations as well as deliver higher overall performance and customer satisfaction. Thanks to its super resilient plastic, which is over ¼" thick, the BB back box significantly reduces musical over-hang found when speakers are installed in double-sided walls (walls dividing multiple rooms). This newly designed back box snaps easily to the rough-in kit and enhances speaker performance by utilizing given air space, delivering clear and clean sound quality.

The RK-6IW kits are designed to work with the BB-6IW and compatible with the Image-6 in-wall speakers. For the ceiling speakers, Earthquake's RK-IQ6 and RK-SS8 are designed to work with the CM Series, IQ Series and SweetSpot in-ceiling speakers.

ROUGH-N-KIT FEATURES:

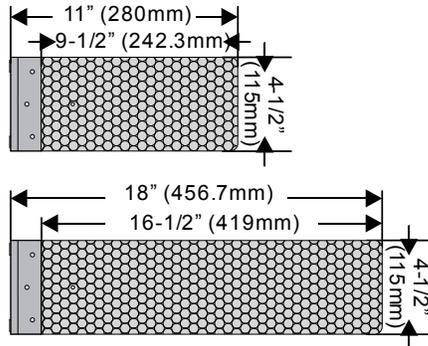

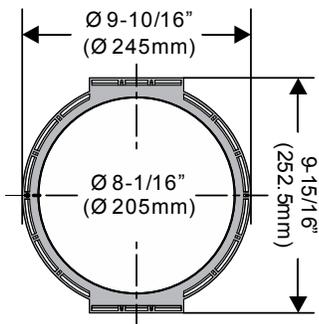

- Extremely quick install
- Easy for Sheetrock installers to spot
- Aluminum dog-ears for more installation flexibility
- Product specific
- Designed to work with Turn-N-Lock™ installation mechanisms
- Meets and exceeds all building codes
