

T3 Innovation

The standard RJ45 plug has always been a huge pain, with Cat6 plugs being even worse! It's time consuming, the conductors don't always reach the end of the connector and the jacket of the UTP cable often finished before the plug, meaning they need to be redone by the installer. The snap plug range is faster and in the end result is better.

RJ45 SNAP PLUG™ CRIMP TOOL

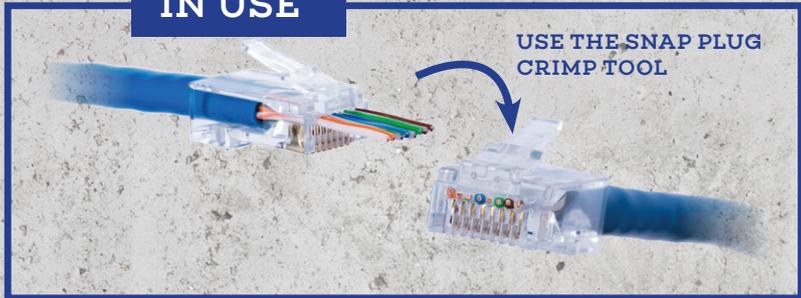

- Designed for the use on Snap Plug
- Crimp and trim at the same time
- Clean flush cut
- Built-in cutter (not for steel)
- Built-in stripper for round cables

SNAP PLUG™

**A NEW WAY TO
TERMINATE RJ45
CAT 5E / CAT6**

▶ Video online

- Enable the conductors to pass through for easy installation. This makes it a lot easier to verify wiring order before crimp, reducing possible errors and waste of materials
- Speed up the termination process

SNAP PLUG™ LOCK

The ideal partner for the snap plug
**GUARANTEES NO
DISCONNECTIONS!**

If you don't want people to fiddle with your network, T3 have an easy way to tamper proof RJ45 connectors. It's called Snap Lock. It would be good for an office or school environment or for special applications like IP cameras and digital signage. Just pull the plastic lock off any patch cord, put on a Snap Lock and you're done!
