

EDGELESS

Product Release

Earthquake's EDGELESS In-Wall, In-Ceiling & Center Speakers "A Seamless Blend Of High-End Audio & Interior Design"

Available with optional square grille (sold separately):

* SG-CS6 for the ECS-6.5
 * SG-CS8 for the ECS-8

The **EDGELESS** Series of In-Wall & In-Ceiling Speakers is one of Earthquake Sound's most valued speaker lines. Designed with aesthetics (WAF-wife approval factor) and sound quality in mind, these speakers seamlessly blend into their surrounding as they provide a lifetime of durability and high-end performance.

Designed like no other, the new **EDGELESS** series is a prime example of Earthquake's continuing pursuit of audio excellence: "the goal is to seamlessly blend into any interior decor and to reproduce the sound of a concert hall or the sound of a movie sound track in any room with these speakers; with seamless super low profile, these speakers blends perfectly with any decor".

The **EDGELESS** speakers deliver deep, natural response from the design of their advanced cones and surrounds. Superb sonic accuracy is guaranteed by the utilization of stiff light weight kevlar cones in the woofer and silk NEO tweeters. Additionally, you can customize the sound of the speakers with +/- 3dB adjustment switches that optimize the sound to the acoustics of the room and end user's own personal preference.

Main Features:

- Frameless design for reduced visibility/seamless blend with smaller footprint (over 20% less than typical frame)
- Magnetically attached versatile (round or square), paintable grilles (square grille are optional & sold separately)
- Paintable grille & frame for perfect integration
- 1" (25mm) silk dome NEO swivel-action tweeters
- Low mass stiff kevlar cone bodies for a very smooth & accurate output with attention to details
- \pm 3dB bass and treble controls
- Elaborate crossover networks with highest quality capacitors and inductors. 12dB/Octave with polyswitch protection.
- Easy Turn-N-Lock™ installation mechanism for safe, time efficient and professional installation.
- Gold plated, spring loaded terminals
